

Building Something Small

Your first real project with Claude Code

Project: Personal Homepage

Prompt: "Create a simple personal homepage with my name, a short bio, three fun facts about me, and a favorite quote. Make it look nice with CSS."

The Process:

1. Give Claude the prompt above
2. Claude creates an HTML file
3. Open the file in your browser (drag to browser window)
4. Don't like something? Tell Claude: 'Make the text bigger'
5. Claude updates the file automatically
6. Refresh browser to see changes

Customization Ideas:

- Change colors to your favorites
- Add a profile photo section
- Include links to social media
- Add a contact button
- Change fonts
- Add your hobbies or interests
