

Project Spec Template

Turn your idea into a clear specification

```
# Project Specification: [Project Name]

## The Problem
[What problem does this solve? Who has this problem?]

## The Solution
[At a high level, how will your tool solve it?]

## Core Features (MVP)
1. [Essential feature 1]
  - What it does
  - Why it's essential

2. [Essential feature 2]
  - What it does
  - Why it's essential

3. [Essential feature 3]
  - What it does
  - Why it's essential

## Nice-to-Have Features (Later)
- [Feature that can wait]
- [Enhancement for version 2]

## User Flow
1. User opens the tool
2. User [does this]
3. Tool [responds this way]
4. User gets [desired result]

## Technical Requirements
- Platform: [Web? Desktop? Mobile?]
- Tech: [HTML/CSS/JS? Python? Other?]
- Data: [What data needs to be stored?]

## Success Criteria
The MVP is done when:
```

- [Criterion 1]
- [Criterion 2]
- I can [specific action] successfully
